

# Grade 1

## Core Knowledge Science

### Organization Guide

#### FREE RESOURCES

**How-to Videos:** Watch the videos to learn to use the CKSci curriculum to homeschool:  
<https://bit.ly/31ep5km>

**Daily Schedule:** A free daily schedule for homeschooling 1<sup>st</sup> grade using the Core Knowledge and MEP Math curriculums is available here: <https://bit.ly/3HnCq9s>

#### PRIMARY MATERIALS

**Units:** There are 5 units in the Grade 1 CK Science curriculum. All students start with Unit 1 and progress through the units in order. You will download each unit separately from the CK website. Each unit will be downloaded as a file folder containing multiple files including the Teacher's Guide and Student Reader.

**Teacher's Guide:** This is the primary resource used for science lessons. When you are ready to start a lesson with your student, you will simply open the PDF file for the Teacher's Guide on your tablet or laptop, navigate to the lesson indicated on the daily schedule, and work through the instructions in the Teacher's Guide for that lesson.

**Student Reader:** This reader contains both images and text and is used on some school days. This reader can be accessed as a PDF file on your student's device.

**Demonstration/Experiment Materials:** A list of materials and equipment needed for the science lessons can be found in the introduction of each unit’s Teacher’s Guide. This list is broken out by lesson.

**Online Resources Website:** Many lessons call for accessing this website which contains additional lesson resources:

<https://www.coreknowledge.org/curriculum/science/cksci-online-resources/>

To find a specific resource, click on the name of the unit and click on the lesson number. Save this website so you can access it easily during lessons.

## GETTING ORGANIZED

**Activity Pages:** The activity pages (and the answer key) for each unit are found in the back of the Teacher’s Guide for each unit. It is easiest to print all the activity pages at once at the beginning of the unit. Activity pages are often used over multiple school days. Save all activity pages until you have completed the unit.

**Advance Preparation for Lessons:** It is useful to review the upcoming science lesson the day before so you can prepare any needed equipment and materials. Many lessons include an “Advance Preparation” section. The advance preparation typically takes no more than 10-15 minutes.

**Multi-Day Lessons:** Some lessons extend over multiple school days. If the schedule specifies “Day 1” for example, the Teacher’s Guide will specify where the “Day 1” vs. “Day 2” portions start.

## IMPORTANT TIPS

**Unit 1 Scheduling:** Most of the Unit 1 lessons are completed at the beginning of the school year, however some Unit 1 lessons are completed later in the school year. This unit teaches the student about the movement of the sun and the phases of the moon. Once the student has learned these concepts, they begin collecting data about these two phenomena over the next few months and this data is reported every Monday. The student will then circle back to the remaining Unit 1 lessons at several points during the school year to analyze and learn more from the data they've collected.

Please be sure to download the Grade 1 Daily Schedule (<https://bit.ly/3HnCq9s>) as it provides a day-by-day schedule.

**Effective and Safe Activities:** In the back of the Unit 1 Teacher's Guide, you will find several useful resources including how to safely work through demonstrations and activities, tips for advance preparation for lessons, and what to do when the activities don't yield the expected result.

**White Board:** Many lessons suggest using a white board, chalk board, or board/chart paper. If you do not have one available, you can use a plain piece of paper to write out or draw the information called for in the activity.

**Classroom-Based Activities:** Some activities in this program are clearly designed for a classroom setting. Please adjust the activity as needed for your situation. For example, if an activity that suggests students work in teams, you can act as your student's teammate. For activities where multiple stations or portions need to be completed, your student can either complete all those portions or you can recruit siblings or other family members to participate too.
